SUMMARY

Software Engineering graduate (Class of 2025) from Jimma University with a strong foundation in programming (JavaScript, TypeScript), problem-solving, and frontend development (React, Next.js, Tailwind CSS). Gained practical experience through internships and competitive hackathons, contributing to real-world solutions in event management, e-commerce, online donation platform and health tech. Passionate about building scalable, user-centered applications that solve real world problems. Known for adaptability, collaboration, and a continuous learning mindset.

EDUCATION

2021 – 2025

BSc in Software Engineering

- Jimma University, Jimma Institute of Technology
- Graduated in 2025 | **CGPA: 3.85** | National Exit Exam: **86%**

EXPERIENCE

INTERN

Eaglelion System Technology

02/2024 – 06/2024

Internship experience

- Participated in project called NU EVENT, an event management and ticketing platform.

Participant

05,2024 - 06,2024

Stride for Ethiopia Hackathon

- Developed a project called AI in disease surveillance, early detection, and preventive health care.

Project Worker

11,2024 - 12,2024,

Venture Meda Hackathon

- Worked on a project called wedshop, an e-commerce platform for wedding related items with AR.

SKILLS

Frontend Development

- React
- Next js
- Tailwind css
- Typescript/Javascript
- Bootstrap

Backend Development

- NodeJs - Junior level

TRAINING / COURSES

- freeCodeCamp
- Programming course freeCode.
- Corsera
- Course from Corsera.
- Udemy
- Online Courses from Udemy.
- Graphics Design
- Cisco Networking Academy, Jimma
- Univeristy

LANGUAGE

- English
- Amharic
- Affan Oromo

KEY ACHIEVEMENT

Awarded 3rd Best Project of the Year at the faculty level (Online Donation Platform)

- Jimma Institute of Technology and Faculty of Computing & Informatics Recognized as the 3rd outstanding final year project in the Faculty of Computing & Informatics.

STRIDE ETHIOPIA HACKATHON PARTICIPANTS.

- Successfully developed and presented a functional prototype within 48 hours, showcasing problem-solving, teamwork, and technical skills under pressure.

NU-EVENT managment Project Success

- Contributed to the successful development of an Event Management and E-commerce Platform (NU Events) during internship.

Cisco Certificate of Completion

- Completed Graphics Design Training under the Cisco Networking Academy at Jimma University, gaining practical skills in visual communication, branding, and digital content creation using industry-standard tools such as Adobe Photoshop and Illustrator.

Graduated with Great Distinction – 3rd in Class (2025)

- Graduated with strong academic performance and hands-on experience in software development, system design, and collaborative projects.
-

PROJECTS

• Online Donation Platform Through NGOs

01/2024 - 04/2025 | Jimma, Ethiopia

A digital platform connecting donors, NGOs, and volunteers to facilitate transparent and efficient donations. Built with a React & Node.js web app for NGOs to manage donations securely and transparently.

• Data Structures and Algorithms Project

01/2023 - 01/2024 | Jimma, Ethiopia

Developed a program in C++ to implement various data structures, such as linked lists, stacks, and queues.

• Event Management System (Internship)

02/2024 - 06/2024 | [EagleLion System technology], [Addis Ababa]

Developed/Assisted in building an event management system during the internship. Participated in frontend development using Next.js, Tailwind CSS, and TypeScript.

• WedShop E-commerce System (Venture Meda Hackathon).

2025 | [Venture Meda ICE Addis], [Jimma University]

Developed an e-commerce platform for wedding materials and services during the hackathon. Participated in frontend development
